Thanks, Jeff!

I assume they'll send me the .xlsx file? Thank you SO much for keeping me out of the email thread until a short time ago! ☺

And I like the good old standby **lorem ipsum dolor sit amet** text. I think I'll keep it. ☺

Subject: Web summary 8/17

Hi Tim,

1) THINGS I DID.

on page <http://www2.epa.gov/goldkingmine/data-gold-king-mine-response>

added a "no data" sentence for August 16.

for Aug 17 data, I created a draft page at 8/17 data page

<https://wcms.epa.gov/node/107071/revisions/223615/view>

2) THINGS PENDING THIS EVENING.

If the data spreadsheet actually happens:

1) please add " (XLSX)" to the end of the file name, when Drupal makes you change the file name. We need to indicate the file type, and Drupal isn't doing this automatically; it's been me all along.

2) add a link to the 8/17 data page, on here:

<https://wcms.epa.gov/goldkingmine/data-gold-king-mine-response>

3) FYI ONLY.

We don't do the map, we only embed it: David Yogi of R9 asked about the map showing Region 9 sampling locations." Nancy Grantham and Danny are handling.

The PIO / EOC Web approval people changed. The people are now John Senn, Laura Gentile, and Micah Ragland.

Rich Mylott asked about a high-res photo. EPA photographer Eric Vance is following up.

There was a brief sidebar about whether or not to change the email destination of the Contact US form submit function, but nothing decided.

Danny talked to them about regularizing the time to post data. Probably to become late mornings.
